

Environmental Problems Worksheet

Questions to consider when identifying problems:

- Are there problems with trash or waste in your community?
- Is the air healthy to breathe?
- Is your community too loud for you to comfortably sleep or do homework?
- Is it easy for you to access water that is safe to drink?
- Are there natural areas you can visit to help you feel peaceful?
- Do you feel safe in your community? Is there anything in the soil that makes it unsafe to eat plants that grow there?
- Are there any issues with bodies of water, like a lake, river, or ocean?
