Science Challenge: Place That Plant!

Hi, I’m Silvia!
I’m in charge of the school’s gardens.

I want to add two new types of plants.

I want them to grow big and healthy.
I want them to reproduce.
That way, we will have more every year!

Challenge:

- Use your science knowledge.
- Find the best place for each type of plant.
- Use your skill with scientific arguments to help Silvia.
