

# Develop an Earth-Sun Model

1. Develop a model to show what causes the Sun to appear to move across the sky and below the horizon.
2. Check your model: Imagine you are standing on Earth at the location of the toothpick. Would the Sun appear to move across the sky and below the horizon?
3. Be prepared to present your model to the class.
  - The two Testers hold the Sun and Earth.
  - The Speaker explains the model.
