

**Aquation** is a strategy game in which you must manage the world's water and wealth to make sure that everyone on Earth has enough freshwater to meet their needs.

**Win the Game:** Redistribute Earth's freshwater so that every region has the amount of water it needs.

## **Basic Gameplay:**

### **Groundwater**

- Tan regions need more water.
- Blue regions have the most water.

### **Wealth**

- Build a pipeline between regions
- Transfer water
- Build a desalination plant
- Purify water using a desalination plant
