# Ocean Ecosystem Notes

- Which ecosystem are you researching?
- What information from the text helps you understand the problem better?
  - ◆ Include examples of systems you think are important to the problem.

# Add to Your Model

- Review the model of the problem you drew in Lesson 1.
- Add to the model or draw a new one.
  - ◆ Use evidence from your ocean research.
  - ◆ Include information about any systems you think are involved in the problem.
  - ◆ Include labels to help other people understand your model.
